

Pull Cart

Transporting the Tour or Sport Portables is easy with the use of this strong, lightweight Pull Cart. Designed to be used with the tables in the vertical position for balance and ease of fitting through doorways. The custom Velcro strap secures the table to the cart and the large 5" rubber wheels make navigating stairs, curbs and athletic fields effortless.

It works well when the table is in the Protective Cover or Airline Travel Case, too.

Conveniently stroll the Tour or Sport to the airline check-in counter and then take the Pull Cart with you aboard the plane (easily stores in the overhead compartment).
