

Extremity Drop and Speeder Board

Designed by Dr. Thuli in 1982

- Straight Drop with Adjustable Tension
- Red Oak base with a firm cushion
- 8" x 6" x 2.5" (20 x 15 x 6 cm)
- Available in black, navy, burgundy or espresso
- Choice of flat cushion or "bump"

Extremity Drop: Flat Cushion

The **Extremity Drop** has a flat surface and is ideal for adjusting shoulders, elbows, knees, ankles & feet.

Speeder Board: "Bump" on Cushion

The **Speeder Board** has a "bump" on the surface of the cushion and is a valuable tool for students to practice their adjusting technique.

The "bump" simulates a high transverse process. By positioning the pisiform on this bump, the student uses it as a set-up point. If desired, the bump can be removed at a later time, resulting in a flat cushion for adjusting extremities.

Please note: These drops are not intended for cervical or pelvic adjusting. Thuli Tables offers a Portable Headpiece and Lumbo-Pelvic Drop for these specific purposes.
