

Airline Travel Case

Tour & Sport Portables

Traveling by air to a seminar or to adjust family or friends? Our Travel Case offers easy loading and protection for your Tour or Sport with custom-molded top & bottom caps and interior protective foam lining. The Lightweight case is made of durable, corrugated plastic and the Heavy-Duty case features rigid plastic.

Make transporting it to the airline check-in easy by placing it on the Pull Cart. After check-in, the Pull Cart can be taken aboard the plane and placed in the overhead luggage compartment. For easy identification at the luggage claim, choose one of the colorful strap options.

Add your company logo and you'll be all set!

AIRLINE BAGGAGE SURCHARGE

Lightweight Travel Case: With the Tour inside, it is under 70 lbs, thereby avoiding a 70 lb baggage surcharge imposed by some airlines.

Heavy-Duty Travel Case: With the Tour inside, it weighs over 70 lbs and may incur an airline baggage surcharge.

Airline Travel Case: Usage

With interior foam padding, the Airline Travel Cases offer protection for the Tour during airline travel. Designed and engineered to be easy to load, lightweight and durable. Available in Lightweight or Heavy-Duty.

The **Lightweight Travel Case** features a corrugated plastic (Coroplast) sleeve. With the table inside, the total weight is just under 70 lbs, which avoids a potential airline baggage surcharge. Coroplast is durable, waterproof and shock absorbent. Please note that the construction tape on the sides of the case simply hide the functional heavy-duty staples which secure the sides together.

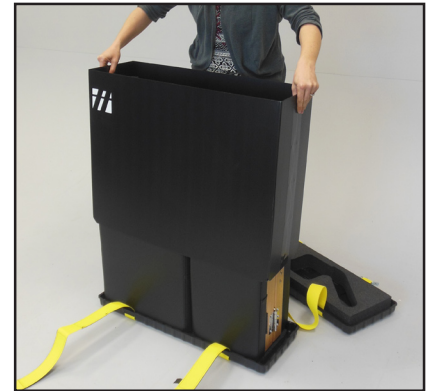

The **Heavy-Duty Travel Case** features a durable, rigid ABS plastic sleeve and is recommended for more rugged use, ex. train or bus travel. With the table inside, the total weight is over 70 lbs.

To prepare the case for loading, unbuckle the straps (but keep them attached to the top and bottom caps). Remove both the top cap and the sleeve.

Place the table into the bottom cap with the correct orientation, as shown in the photo.

Slide the sleeve over the table with the correct orientation, as shown in the photo. Be sure the sleeve fits snugly inside the bottom cap.

Place the top cap over the sleeve. Secure the case closed by buckling the two straps.

Lift the Travel Case by grasping the straps.

For ease of transport and navigating door openings and stairs, place the Travel Case in the vertical position onto the Pull Cart. Secure down with Pull Cart straps.
