

Tour Flexion Distraction and Lateral Flexion

FLEXION DISTRACTION DEVICE

Add Flexion Distraction to your Tour Portable with this ingenious, mechanical device. Simply fold the table's back legs into their storage position and effortlessly attach the Device in seconds. It also quickly disassembles for portability so you can take it on the road. Component parts are individually protected in a custom Travel Case (optional).

LATERAL FLEXION BASE

Must be used in conjunction with the Flexion Distraction Device. The Lateral Flexion Base offers 30 degrees right and 30 degrees left flexion and can be locked in at any position along the 60 degree arc. Multiple, compound angles are also available. Speciality wheels offer quiet, smooth and instant directional change. We do not consider the Lateral Flexion Base to be "portable".

RETROFIT

Available for 20"- 24" Tours built after 2001
Retrofit Kit needed for tables 2001 - March 2013
